

IFoA Strategy for 2025-26

Our focus this year will be continuing to deliver for our members and laying the foundations for future success.

This focus is in-line with our evolving **vision** set by Council to be the leading global professional body qualifying, supporting, and championing actuaries, serving the public interest, and advancing actuarial science.

For 2025-26, our **strategic pillars, objectives and priorities** will be:

Pillar	Objective	Priority
Learning 	We provide what members need for what the world demands	We demonstrate high levels of exam integrity, underpinned by a secure and reliable delivery model
Standards 	We work with our members and stakeholders to serve the public interest and enhance the profession's reputation	We prepare for, and seek to collaborate on and influence, a positive, public interest-focused outcome of the UK review of actuarial regulation
Membership 	We provide a meaningful proposition that members can count on wherever they are	We articulate a clear global member proposition
Effectiveness 	We optimise operations to enable a sustainable, inclusive, member-led organisation	We strengthen organisational sustainability and develop and outline a new member-driven strategy for 2026 onwards

We want our strategy to be more than a list of goals. Our actions will enhance our services and offerings, as well as ensure we maintain a focus on continuous improvement.
